

## **Allan Sharp Brief Bio**

Allan Sharp is an entrepreneur and senior engineer in the electrical, air conditioning, and plumbing industry. For over 30 years, he has been involved with many of the larger projects in Belize either as designer, consultant, or installation contractor while at Quan Engineering Ltd., Bowen & Bowen Ltd., and through his successful company Sharp Engineering Ltd (previously AMS Hardware). He started his career at Quan Engineering Co. Ltd. in 1989 and became general manager within a couple years. He opened his company in 1995 which worked on projects such as the Belikin Brewery, Coke Factory's new bottling lines, Bennys Superstore, Belize Aquaculture's shrimp farm ponds, 100K ft<sup>2</sup> processing plant, 22 MW power plant, and many commercial offices, warehouses, schools, and more. He was the MEP consultant for the Central Bank of Belize during construction and again recently for their equipment upgrade and renovation projects. From 2000 to 2017 was also Director of Engineering for Bowen & Bowen Ltd. group of companies where the department led the design and project management for all B&B projects countrywide. In 2017, Allan returned to full-time engineering, consulting, and construction in the electrical, air conditioning, and plumbing services with his company Sharp Engineering Ltd. Allan also serves on non-profit and volunteer boards including the Belize Olympic Committee, Belize Elementary School, among others.
